

Flask and Vue

Paul Patena

Python and Vue JS

- Lightweight
- Cross platform
- Container friendly
- Cloud friendly

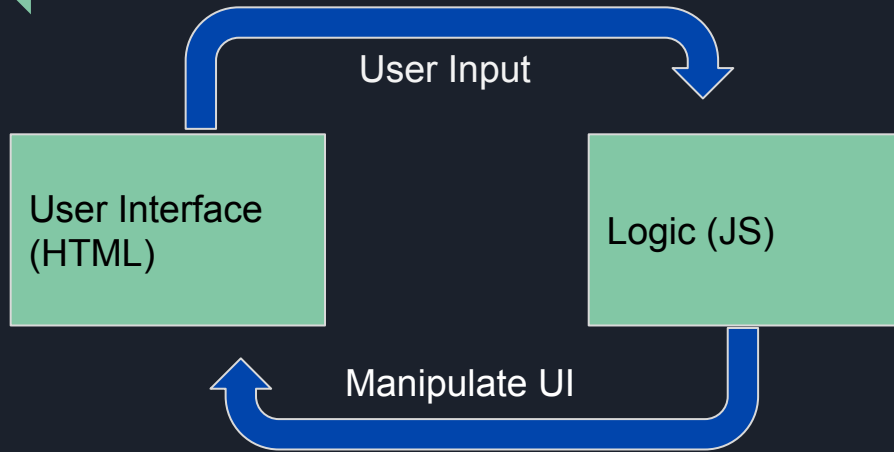

Angular, React, Vue

VueJS combines the best features of Angular (directives) and React JS.

React and Vue are closely related wherein they follow the same principles of reactivity.

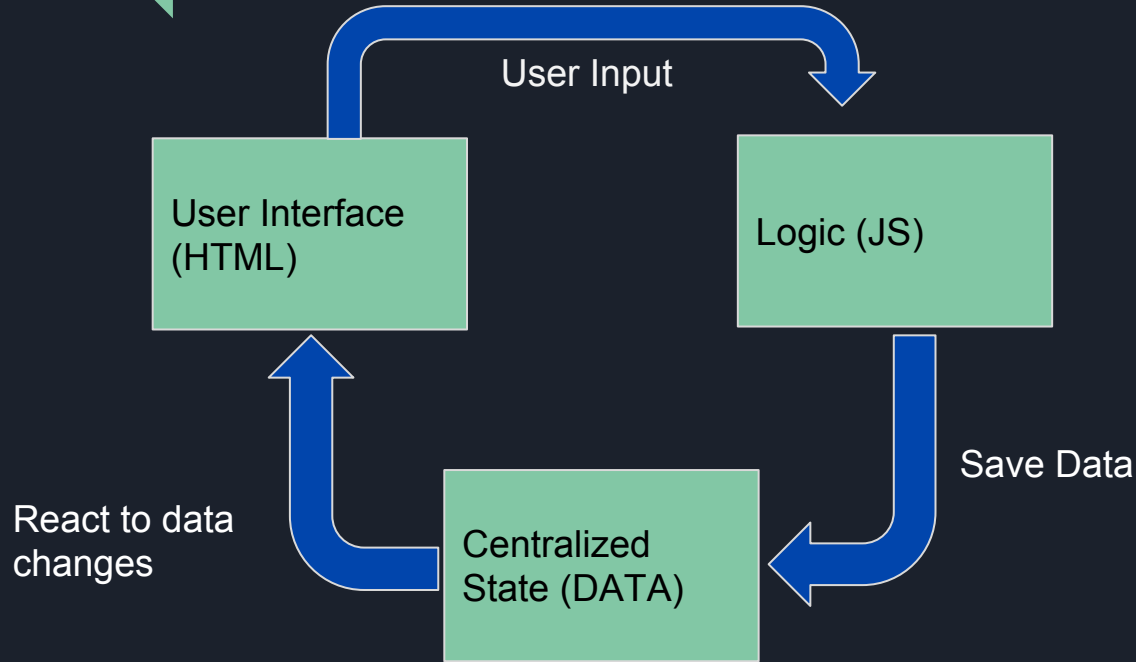

In my opinion, Vue is more organized, maintainable and leverages on your existing knowledge because it uses vanilla HTML events, vanilla JS ES5/ES6 and vanilla CSS.

Vanilla HTML, JS

Tight coupling
between UI and logic

Reactive Frameworks

Decouple data and UI
